OBJECTIVE

Seeking a Software Engineer position specializing in Java, where I can utilize my expertise in full-stack development, object-oriented programming, and algorithmic problem-solving to contribute to innovative projects within a dynamic team environment.

TECHNICAL SKILLS

Languages	: HTML, CSS, JavaScript, SQL, Java
Frameworks	: React.js, Angular(Basic), Bootstrap, Spring Boot
Libraries	: Material, React Router, JWT
Databases	: MySQL, Oracle
Dev Tools	: Visual Studio Code, STS, Github, Eclipse, PostMan, RestMan

EXPERIENCE

Trainee Software engineer

Aadasteck

Apl 2025 – present

T-Nagar, Chennai

- Working at Aadasteck as a Java Full Stack Developer, responsible for developing RESTful APIs using Spring Boot, integrating frontend components built in React.js, and optimizing application performance. Collaborating with cross-functional teams to deliver maintainable, high-quality code.

Software Trainee Intern

Eagle-HiTech Softclou Pvt Ltd

Sept 2024 – Jan 2025

Onsite – Kodambakkam, Chennai

Built a Library Management System with Spring Boot, Hibernate, and MySQL, implementing RESTful APIs and testing with Postman.

EDUCATION

Anand Institute of Higher technology - 7.91

Bachelor of Technology in Information technology

Kazhipattur, Chennai

Aug 2020 – Jun 2024

XII - MMHSS - 64

Computer Science

peravurani, Thanjavur

Jun 2019 – Mar 2020

X - DR.JC.Kumarappa - 75

General

peravurani, Thanjavur

Jun 2017 – Mar 2018

PROJECTS

Project 1

React, CSS, JavaScript, Java, Springboot, MySQL, Git

Apl 2025 – Present

- The Employee Form module is built using Angular to capture and validate employee details through a responsive UI, ensuring seamless user interaction. The backend is developed with Spring Boot and MySQL to securely store employee data, handle CRUD operations, and maintain efficient database management.

Project 2

Java, Spring Boot, React.js, MySQL, REST API, Git

Jun 2024 – Present

- Currently working as a Java Full Stack Developer on the "Jessica Brooks – HRV Light Structures" project, contributing to the design and development of scalable modules using Spring Boot and React.js.
- Implemented and optimized RESTful APIs for data management and ensured seamless frontend-backend integration for better user experience.

Project 3

HTML, CSS, JavaScript, Python, Git

Apr 2024 – Jun 2024

- "Intelligent Traffic Management using Edge Computing" involves leveraging edge devices, such as local sensors and cameras, to process traffic data in real-time.
